SMEs which trade across borders are more likely to grow and be successful. Enterprise Europe Network Wales can help you grow by making the most of business opportunities in the EU and beyond. As your local gateway to doing business abroad, we work with our network colleagues in 54 countries, including the BRIC economies, to find commercial and technical partners to develop your ideas, technologies and innovations.

How can we help you?

- **Find new business partners across Europe and beyond.** The network, supported by our powerful technology and business search tools, gives you access to thousands of company profiles in exploitable markets. Whether you are looking for export partners, distributors, license agreements, technology transfer, joint ventures, etc our database can help you find the perfect match.
- **Helping you get the funding you need.** We can help you investigate different funding options for your business, including how to access EU funds such as Horizon 2020.
- **Research & Innovation.** The Enterprise Europe Network database has thousands of technology profiles either looking for or offering the latest innovations and ideas. Whether you need a certain technology to complete your innovation or have come up with a cutting-edge process and are looking for a market, we can help you find the right partner to exploit the potential of your innovation.
- **Navigating EU laws and standards.** We can guide you through the maze of EU legislation as well as help you understand what legal requirements you may face when trading overseas. If you have a specific question about a particular piece of legislation, our European Information Officer will be able to find the answer.
- **Having your say.** If you feel EU regulations are holding your business back or shutting you out of EU markets, we can give you practical advice about the regulations and ensure your experience of how legislation works on the ground gets back to policy makers. We also make your voice heard through participation in relevant EU consultations.
