Cell therapy challenges

Brief introduction to TrakCel

Investment Opportunities

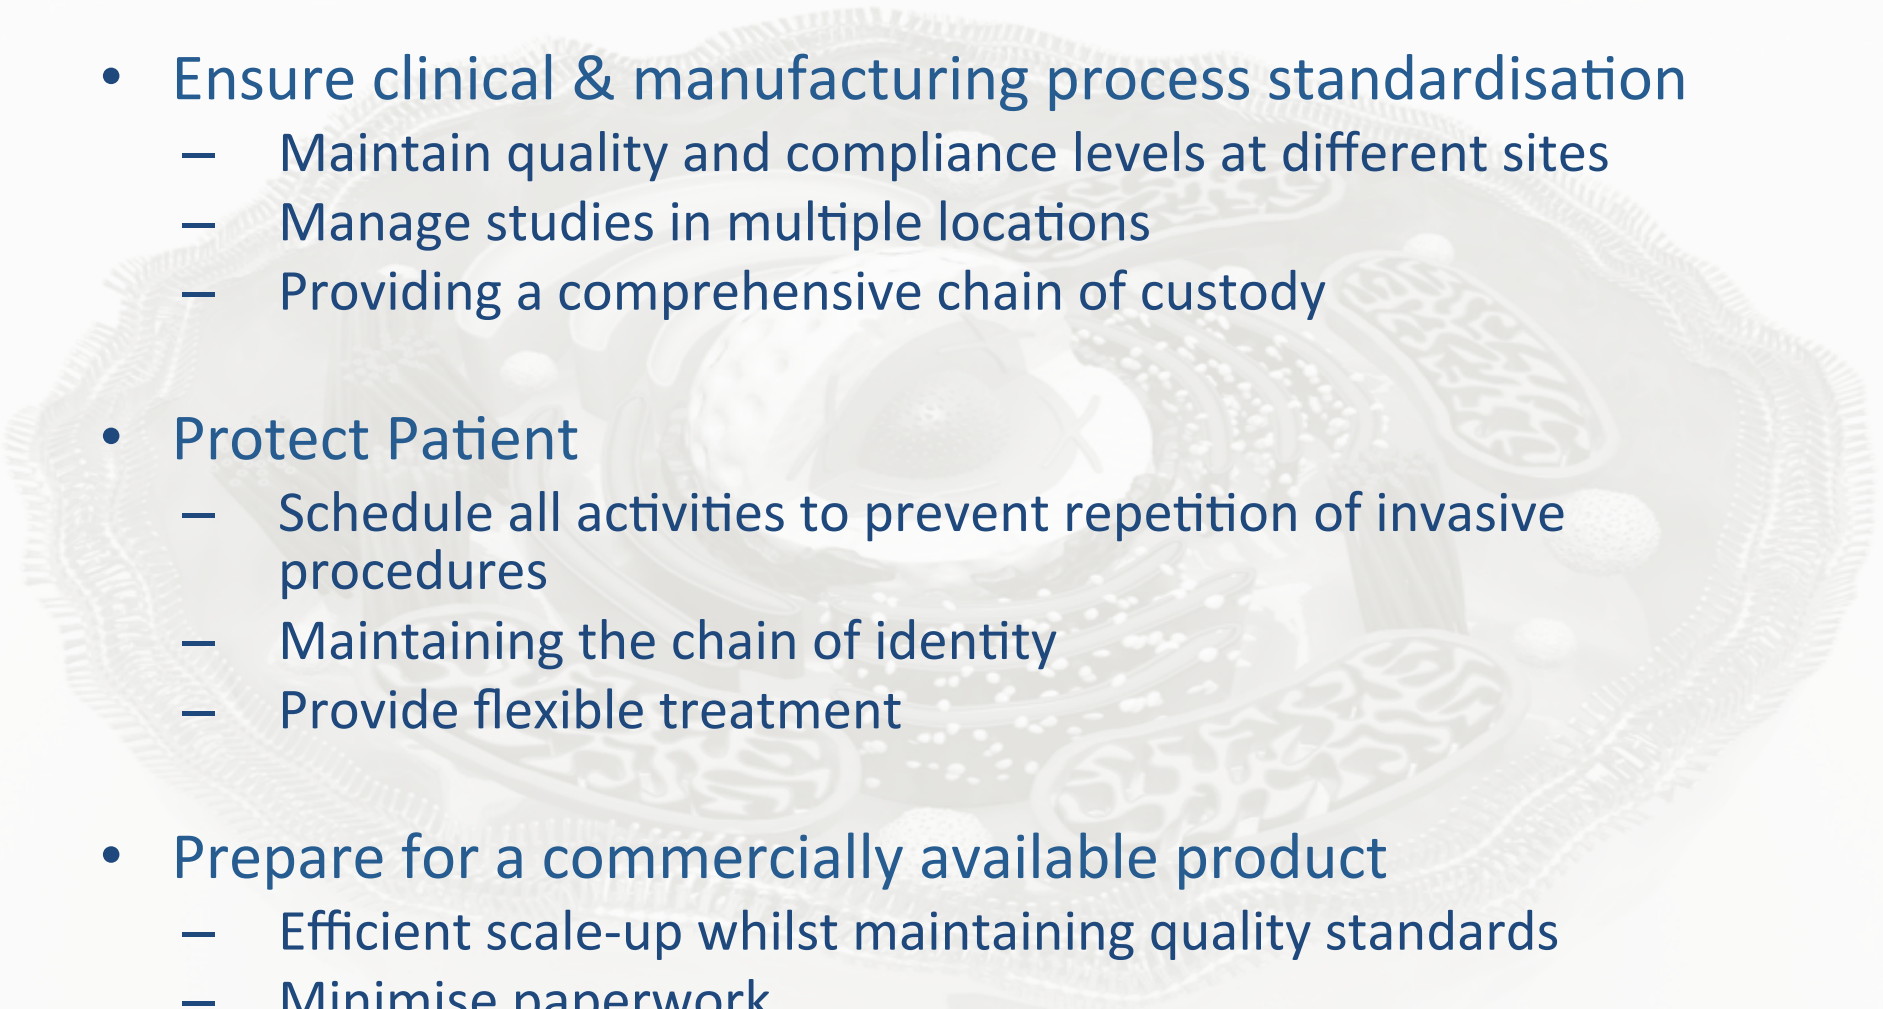

Cell therapy challenges

Brief introduction to TrakCel

Investment Opportunities

- 
- Ensure clinical & manufacturing process standardisation
 - Maintain quality and compliance levels at different sites
 - Manage studies in multiple locations
 - Providing a comprehensive chain of custody
 - Protect Patient
 - Schedule all activities to prevent repetition of invasive procedures
 - Maintaining the chain of identity
 - Provide flexible treatment
 - Prepare for a commercially available product
 - Efficient scale-up whilst maintaining quality standards
 - Minimise paperwork
 - Manage multiple products, suppliers, assets and sites in an easy and efficient manner

“The major challenge in manufacturing this product is not in the manufacturing protocol...

Logistics is perhaps the more challenging aspect of producing this product due to the short shelf life of both the incoming apheresis units and the final product.

Given the tight manufacturing schedule, short process time limitations, overlapping production schedules, QC testing, and complex shipping situations.

It will be difficult to generate this product at high throughput without substantial attention paid to coordinating and orchestrating these events.”

Investment Opportunities

TrakCel integrates the entire supply chain

TrakCel

TrakCel integrates the entire supply chain

TrakCel

TrakWeb™

Secure online portal provides instant visibility of the entire end-to-end supply chain from your desktop.

TrakFlow™

Process configuration engine allows you to configure and control the overall supply chain with tailored workflows.

TrakPad™

Deployed at key points throughout the supply chain to deliver guidance and action lists to stakeholders.

TrakZone™

Deployed at facilities, clean rooms and other key locations to control access to location-specific functionality and deliver enhanced security.

ColdTrak™

Cold chain monitoring probes with real-time reports and alerts for temperature-sensitive shipments worldwide.

Cell therapy challenges

Brief introduction to TrakCel

Investment Opportunities

The background of the slide features a grayscale, high-magnification micrograph of numerous spherical cells. These cells have a highly textured, bumpy surface and many fine, hair-like projections (microvilli) extending from them. They are distributed across the entire slide, creating a scientific and cellular theme.

Investment Opportunities:

Current funding round based on shareholder rights issue

Grant funded collaborations with other Cell Therapy Industry companies

2016 Q4 funding seeking added value investors
