

Introducing AliveCor

June 2017

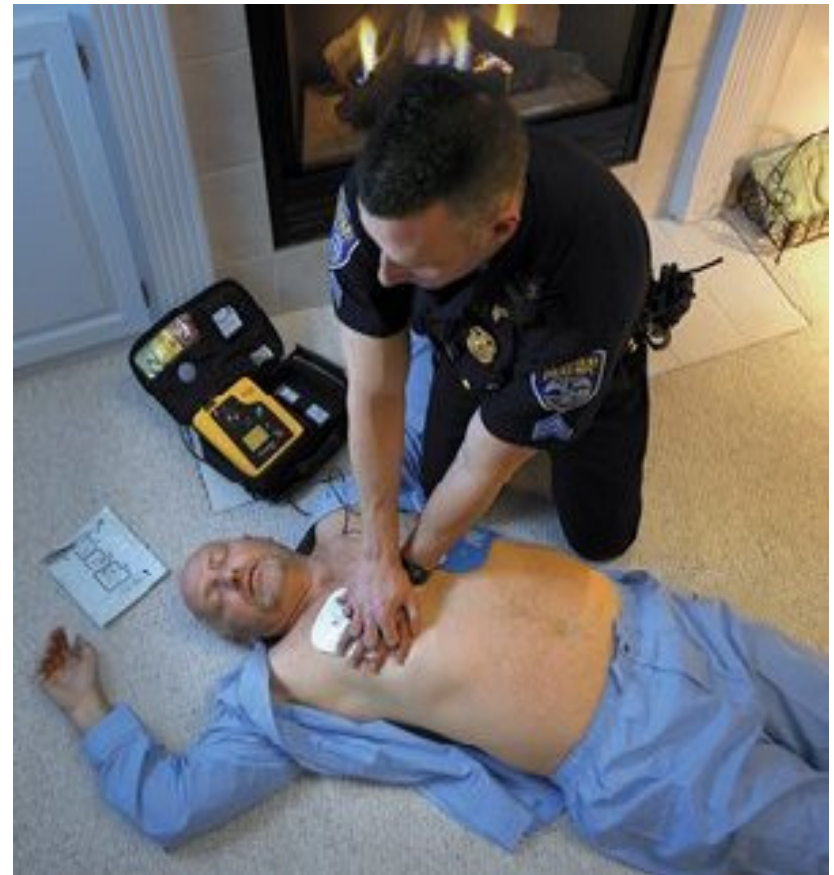

AliveCor[®]

Worst cases of arrhythmias

- Stroke – dead section of brain

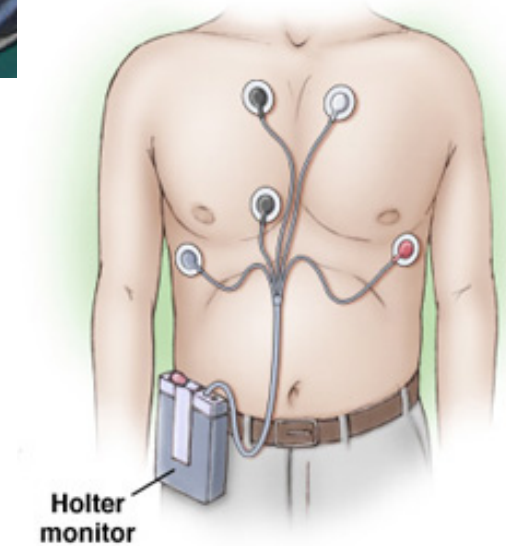

Sudden Cardiac Arrest

How do you find AF?

Two appointments? More?

© 2004 NorthPoint Domain

Why not just 1?

- Make diagnosis
- Rhythm strip PDF
- (email Cardiologist if uncertain)

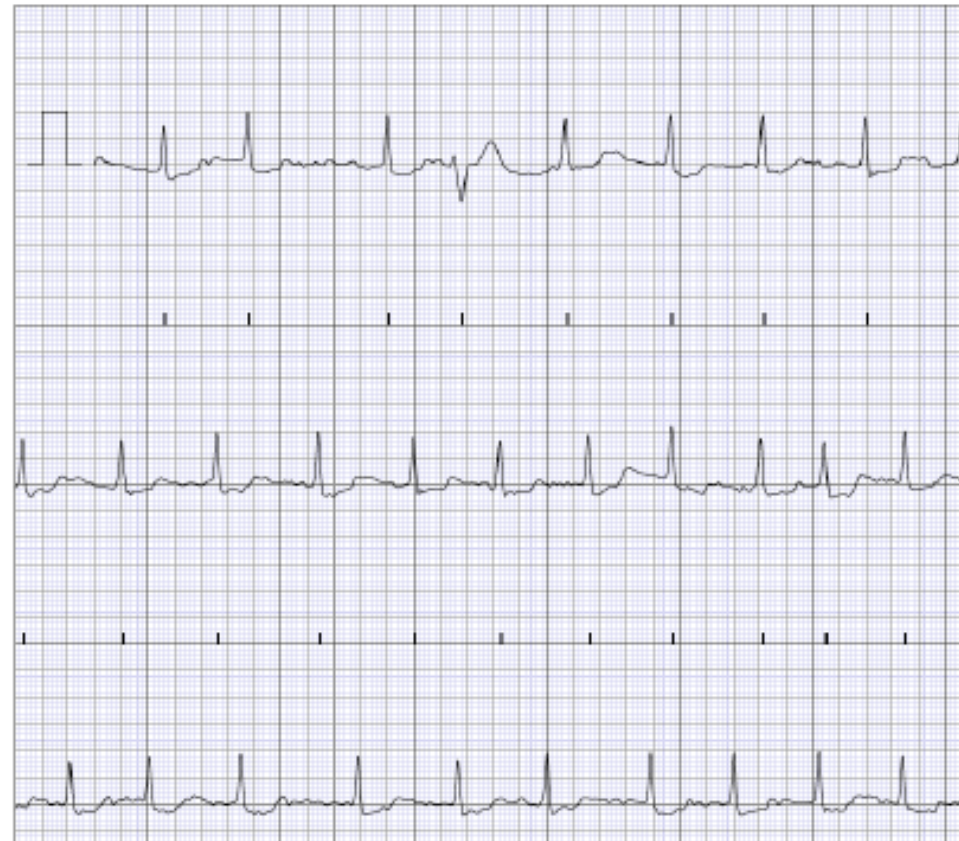

Patient: Frank G
Heart Rate: 90bpm

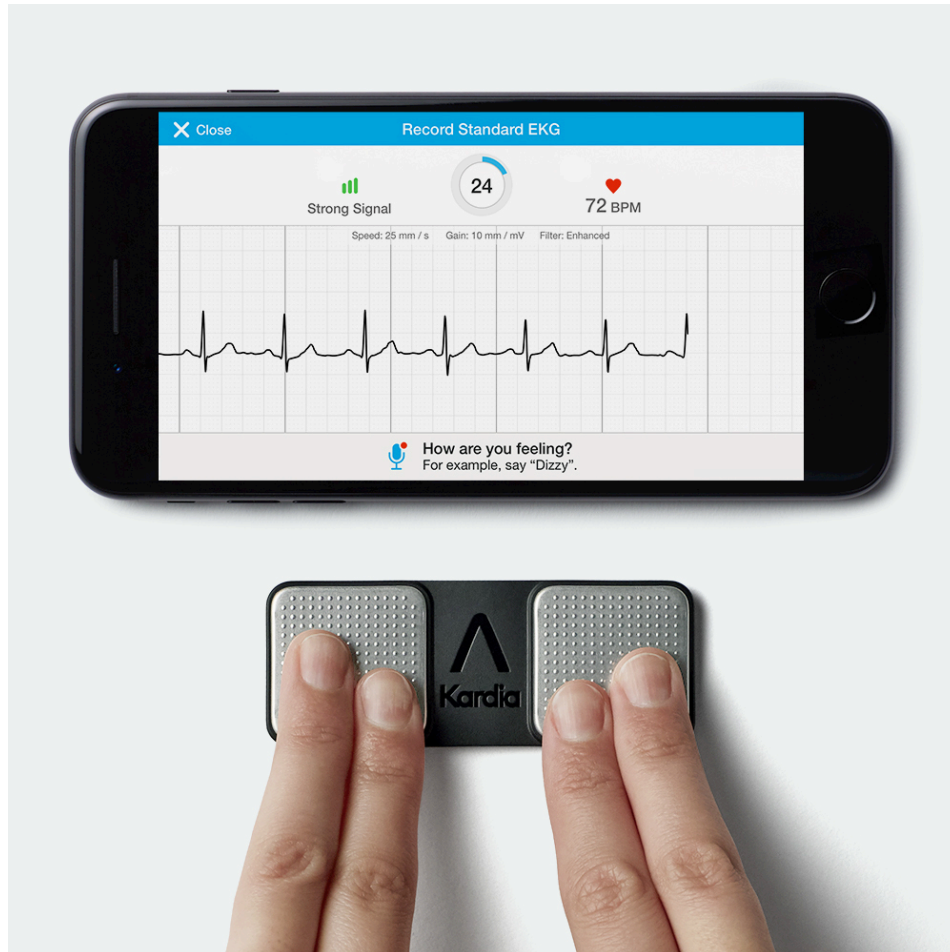

Duration: 30s

Patient symptoms: Dizziness, Chest pain, Anxiety
Findings by AliveCor: Possible atrial fibrillation

Enhanced filter, Main Filter: 50Hz Scale: 25mm

Cardiac care for the 21st century

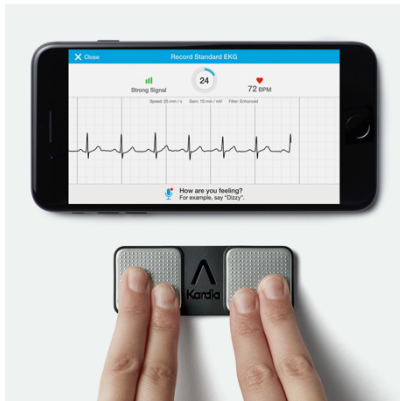

More people die from heart disease and stroke each year than any other disease.

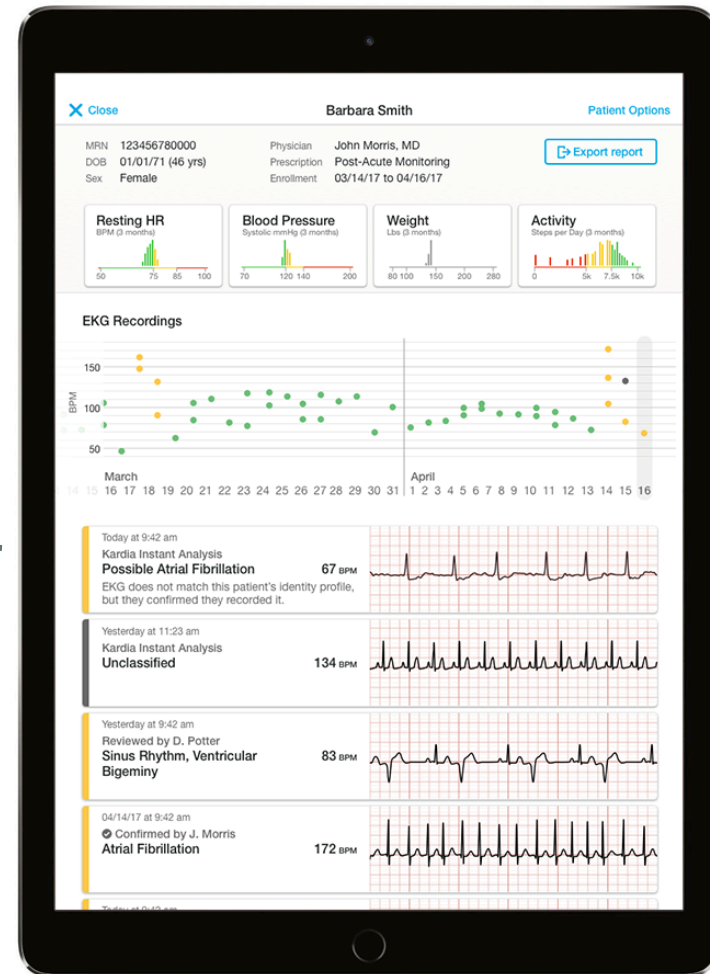

Kardia provides the easiest way to detect possible atrial fibrillation early and reduce your risk of stroke so you can live life with confidence.

Kardia Pro: cloud-based platform for doctors

- Artificial intelligence-enabled platform for doctors to monitor Kardia Mobile patients for early detection of AFib
- Designed to improve patient outcomes and increase patient and doctor engagement

Kardia Mobile personal EKG

Kardia Pro patient file showing longitudinal EKGs, resting heart rate, blood pressure, and activity

The future: Self-Care

AliveCor's mission

By harnessing the power of artificial intelligence, we're advancing the practice of medicine for doctors and society. And we're just getting warmed up.
