RARE DISEASES

OUR CLIENTS

We serve a wide range of national and international clients in e-Health, including pharmaceutical companies, medical-scientific associations, and the healthcare organizations

We have international experience serving major pharmaceutical companies with advanced web and mobile applications, and Software Medical Devices certified through CE marking

iGRO

A web-based prediction tool that helps endocrinologists and pediatricians treat children with *idiopathic growth hormone deficiency (IGDH)*, *turner syndrome* or *children born small for gestational age (SGA)*

Supports the dosing of growth hormone in children

Developed using growth prediction algorithms based on over 25 years of study conducted on >83,000 children treated with growth hormone

Usable on any computer or tablet

Launched and rolled-out in more than 25 countries in Europe, Middle East, LATAM and Asia

iMONITOR

An easy-to-use web app for rheumatologists to remotely monitor and manage patients with *arthritis*, *psoriasis arthritis* and *ankylosing spondylitis*

The software has been adapted and localized in **6** EU countries

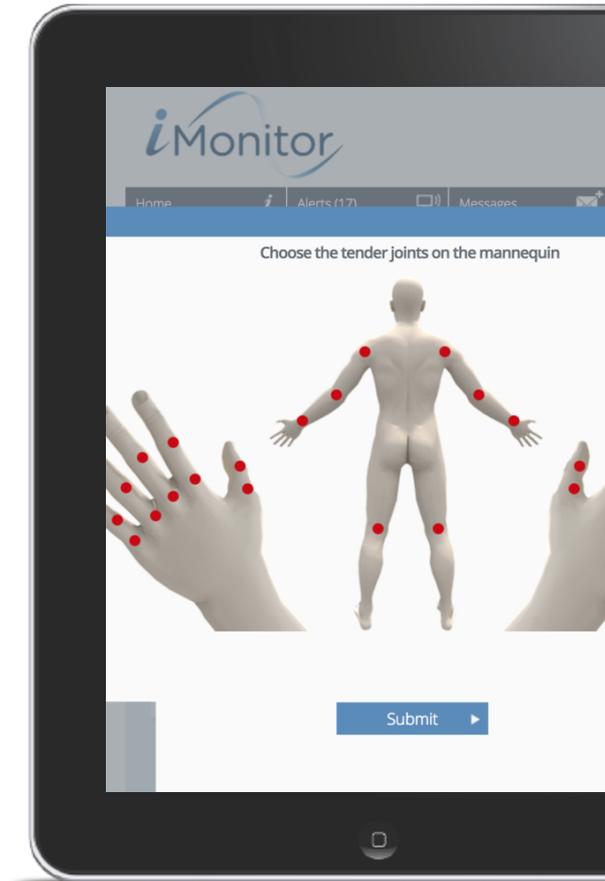

The platform allows direct communication between rheumatologist and patients

Optimised frequency of check-ups provided

iMonitor is based on the integration of two algorithms: medical and Patient Reported Outcomes (PROs)

AZFASTNET

A web app that improves the process for oncologists to receive results of bio-molecular diagnostic tests on patients affected by *lung* and *ovarian cancer*

Enables formulation of personalized therapies

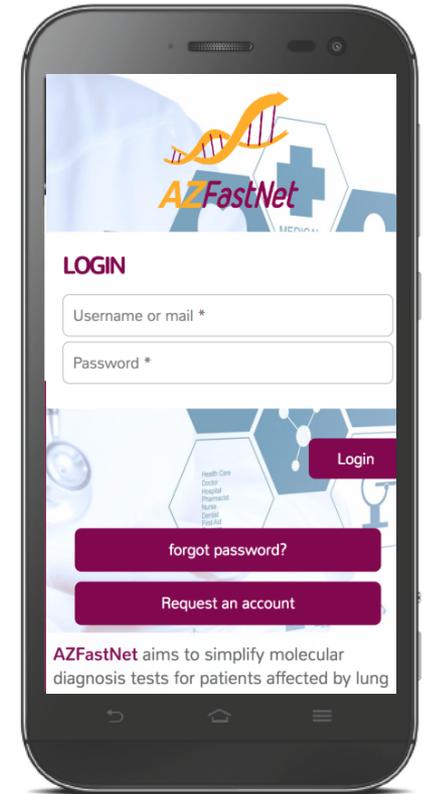

Connects oncologists, pathologists and diagnostic labs

BRCA1, BRCA2 and EGFR gene mutation test

AstraZeneca
