  - Two floors, new coffee shop and retail
-

# BUILDING OUR COMMUNITY.

Building Our Community invites groups from **Butetown, Grangetown and Riverside** to monthly site visits at Techniquest, to experience and track building developments and find out more about different careers in engineering and construction.

Participants will use their experiences to create art pieces of their chosen, local buildings for Techniquest's new community room, to be launched with The Science Capital.

"Increasing diversity within the construction industry is important to us and we're delighted to be able to support Techniquest and people living in the local area." **Adam Oakley, Managing Director**

**TECHNIQUEST**
